## SET-UP INSTRUCTIONS (STEPS 1-3)

1) Based on document thickness you must first determine the optimal coil diameter size needed. To do this, insert your full unbound document into the Diameter Scale.

See picture 1

2) Open Electric Roller. See picture 2.

3) Based on document length, you must now adjust the side margin for an evenly centered punch. To do so, press and slide Side Margin Control. See Picture 3.

**Hint:** We recommend for you to test punch some waste paper and readjust the Side Margin Control as needed.

## PUNCHING & INSERTING (STEPS 4-7)

4) Insert sheets into the punch throat and pull handle forward to punch. See picture 4

**Important:** Make sure sheets are fully inserted and slid against the side margin.

5) Insert pre-selected coil into first 3-4 holes. See picture 5

6) Use Electric roller to complete coil insertion. See picture 6.

### Hints:

a) Make sure all holes are evenly aligned.

b) Use both hands to firmly hold left and right side of document as close as possible to punched holes.

c) Press foot pedal first, then gently bring document parallel to roller until coil touches the roller. Do not apply excess pressure as this may distort the coil pitch and coil insertion may become more difficult.

7) Crimp both ends to securely lock your bound book. **Hint:** Crimper's Red eye should be facing toward the operator. See picture 7
